Car action games racing 2020 mod apk

Source: Android Central We've turned up the best racing games found in Google's play store. With so many choices, we've compiled a list that covers all slews of subgen genres, from regular arcade races to very realistic race sims, so you'll have to find a great game to suit your tastes. If you want great games in other genres, you can also check out our list of your favorite Android games. Prepare. Hit the road! GRID Autosport results in console-quality racing to Android without compromise in terms of graphics or gameplay. The game offers some of the best graphics and textures I've seen from mobile games. The physics engine is dynamic, and when you exchange paint with your opponent in a corner, you're seeing real-time damage to your car. From open wheels and touring circuits to street drag races to arcade-style demolition races, there are just a few tracks that drive more than 100 cars and race across a wide range of fields. GRID Autosport allows you to increase the difficulty of racing with scalable difficulty that allows for an easier, arcade-style experience for casual gamers, as well as for fans who crave pure race simulation. The game offers great flexibility for touchscreen controls, but you'll want to take advantage of bluetooth controller support. It's better to use a physical controller, but if you need to find one for mobile gaming, we've covered it. It should be perfectly suitable for running games like GRID, so it's a bit disappointing that there's a lack of support for NVIDIA Shield TVs, but they're a break. GRID Autosport is a premium game, but if you're looking for the best racing action on Android, it's worth the money. GRID Autosport is a full-featured racing game for Android with a huge roster of cars to choose from and tons of tracks and circuits to burn down the rubber. Choose from more traditional racing modes, hit the streets with drag and drift races, or smash up in demolition derbies. Nintendo is as blessed as a curse to play mario kart tours freely - it means millions of people jump in and play, but it also means that the game is designed to carefully subscribe to monthly gold passes and entice you to spend on in-app currency to unlock more characters and rewards at a faster pace. The gameplay itself is as frantic and chaotic as you'd expect from a Mario Kart game, and it's easily the most fun I've had in a mobile racing game in some time. On most fronts, this looks like a true Mario Kart experience, complete with item boxes and coins scattered across each course, fun shortcuts to discover, and a more familiar sting of the familiar thrill and defeat of victory. But this is despite oversimplified controls, invisible bumper rails keeping them from leaving the course and other bizarre limitations Nintendo hasn't many ways, the only new aspect of mario kart tour is that it is available to play with smartphones. With fewer courses and characters available, to unlock them all, you'll have to spend more cash than just buying nintendo switch's latest Mario Kart game. But again, you don't have to spend money to enjoy the Mario Kart tour - until you start getting matchups with those players who, of course, have spent the gob of it to upgrade their drivers and carts. Mario Kart Tour allows you to play some of your favorite race tracks, along with some new ones, right from your phone. There are a lot of characters, cars and items to unlock. Compete with others around the world to see how well you match up! Asphalt 9: Legend is the latest entry in one of the most popular race title games available on the Google Play Store. It skips all pretenses of realism and provides an over-the-top, high-octane experience with every fixation. Players can work (or pay) their way through career mode to unlock new rides or upgrade what they have. You can play against online opponents in 8 races fast in the wild. The controls are TouchDrive by default, allowing you to shift lanes, drift and focus on using nitro to hit certain jumps and routes while the game itself handles your acceleration and steering. There are other control options, such as on-screen controls and tilt steering, but honestly, it's best to play on TouchDrive until you get the handle of the game. Incredibly sophisticated graphics and an excellent soundtrack make Asphalt 9 an adrenaline trip that you won't soon forget. Download Asphalt 9: Legend (free w/IAP) Asphalt is one of the best racing franchises for mobile with high-octane racing in more than 50 of the world's top racing cars. There is a full career mode to enjoy in wild arcade style racing action. Riptide GP: Renegades is the latest and largest of the futuristic jet ski racing franchises on Android. Harkeyne, Riptide GP back to game memories like Jet Moto and Wave Race 64; Renegades features a story-driven career mode alongside options for quick races and running battles against online opponents. The graphics are top notch, with water and motion blur effects, giving the game a good sense of speed. It uses tilt steering to control your hydrojet, which is not ideal, but bluetooth gamepads are also supported to make things smoother. Speaking of controls, one of the key aspects of the game is pulling off insane stunts that are easy to do with a quick swipe. There are plenty of features to unlock and upgrade when playing in career mode, and ai is top notch and offers a real challenge compared to other racing games for Android. You need a pretty good phone to handle graphics and gameplay and also play nicely on Nvidia Shield Android TV box. If you're looking for some tips before diving, check out our beginner guide for The Riptide GP: Renegade. Ready to get a little wet? Riptide GP: Renegades is still a stylish wave racer that is one of the best looking racing games on Android. This game stands out from other racing games in the way it blends fast car chases with the best elements from the endless runner genre. Soon, you'll be drawn into a great art style that plots curb attractions and towns that you'll have to go through on your lawless tour, using procedurally generated maps. You need to be an expert driver to collect all the bottle caps as you go, which is spent to unlock your selection of 29 uniquely cool cars. Endless Runner is a casual game, but touch controls require your full attention with the quick input used to drive your car through tight spots. Each car you unlock has its own speed and handling, but you can master each one and tour five cities each, traversing three terrains: desert, snow, and jungle. The free version downloaded from the Play Store includes ads that you can watch to extend the run - or you can pay for a one-time in-app purchase to remove ads and get a permanent in-game bonus. This is an endless driving game where you are crossing multiple counties. All you have to do is keep your car fuel and avoid crashes while outracing the police - easier said than done! Horizon Chase is a fun retro-style racer with gameplay reminiscent of classic 80s arcade racer Pole Position. Featuring bright and colorful retro graphics and over 70 tracks spanning 32 cities, there's a lot of fun to have here. You have to start each race from behind a 20 car pack and weave your way past your opponents to take the crown. Keep winning to upgrade and unlock 16 available cars. You get to play San Francisco tracks, but then you have to pay to unlock the full game. Given how beautiful and fun this game is, we will bet you. Horizon Chase is a vow to old arcade classics, from pole position to outrun to Kruson USA. The soundtrack is just amazing and all of it make me feel like a kid falling in the quarters again or launching my N64. Race through bright and colorful locales in Horizon Chase, throwback racers that offer fun arcade action with or without a controller in hand. Do you want to race but have one hand free? Thumb Drift is the perfect game for you! Four increasingly challenging courses are to drift sideways. There are more than 100 cars to buy through in-app purchases, or randomly unlocking them using coins collected on the track or through special tricks, there is a time of mindless fun to have here. Thumb Drift is the casual, endless racer you've been waiting for. This is not the most attractive or adorable racing game on this list, especially how IAP is in your face. Sometimes, a bit of heartless fun is worth installing. Thumb drift is not so much. If it sounds like something you enjoy, give it a shot. With simple one-sum controls, Thumb Drift is a casual endless racing game with more than 100 cars to unlock and drift through six unique tracks. Real Racing 3 is a stunning mobile racing game that is bound to keep hardcore gearheads entertained. Put a real brand name car on a real-world truck and hence the name - and the lap time is recorded from your friends and features an interesting asynchronous multiplayer system that races against the bot you are driving at that time. Of course, you can hit them and influence track time and have a single-player career worth playing too. Over time, players can win new cars and upgrade various mechanical bits with prize money, but make sure you take it easy on your car - you need to keep your ride in good condition to avoid repair costs. This is an EA game and you can expect a slew of regular micro-transactions. Includes three different in-game currencies to achieve different things. It's a typical EA move and personally sours otherwise fun racing games for me. Real Racing 3 is gorgeous and the white knuckle racing action will keep you coming back for more. CSR Racing is a clean cut drag racing game. Players don't have to worry about steering - all you have to do is completely time your gear has changed. The indicator will tell you when to do your next shift and assuming your timing is up to the snuff and your ride will be upgraded enough, you need to pull across the finish line in front of your opponent and win some prize money. Premium currencies can be used to buy high-end cars, and standard currencies can be used not only to buy other cars, but also to upgrade certain parts such as gearboxes, engines, intakes and bodies. There are several other racing games in this franchise, including CSR Racing 2 and CSR Classic, but at first it is still the best in our book. CSR Racing boils down drag racing to pure Twitch reflection. With more than 100 licensed cars that can be upgraded and customized, how far will you go on the World Tour? Multiplayer, unlock in over 70 cars and offer plenty of customization and racing options. It's a racing game that crams in a lot of what you'd expect, the only downside is the freemium model. Sounds pretty strange, but the story takes second place next to high-octane racing action. You have tons of cars to make a name for yourself and work to be the best driver in the city. Top Speed 2 offers some good vehicle customization, but that's not without its drawbacks. There are a lot of in-app purchases that you can find here. You will be asked to spend money on refueling (stamina), loading boxes for car parts, and upgrades for your car. It all feels pretty slimy, but the game itself is fun enough. The popular Top Speed sequel results in everything you loved about the first game, just good, just good. Drive and customize more than 70 cars and prove the best racers around. If you want to manage racers, not racers? You build your own racing team from scratch and compete in international events to be the best. Control everything from hiring drivers to upgrading your car. The strategy is the name of the game here and you are also working to have the most efficient pit stop. You need to be prepared for anything, like a change in the weather or a crash. It's a really very robust game, you're forced to look at the big picture of what's going into a given race. With a constantly evolving challenge to meet your increasing skills Motorsport Manager Mobile 3 (what a bite) promises less high octane action than some of the other games on this list and it provides an excellent experience that will excite you to manage the race team instead. It's time to get out of the driver's seat, put on the manager's hat and build up the whole race team. You can control all aspects, from training to upgrades. Source: Google Play Store Grand Prix Story is a different racing Sim, along quite different in function and form from Motorsport Manager Mobile 3. This pixel art adventure is much less serious, cuter and more fun than MMM3. You're still in charge of the racing team, not a single driver, but some people may prefer it. If so, read on. Realism is not important here. It's about having a good time with a great art style. You're a manager, so it's up to you to recruit drivers, train them, build sponsorship deals and make sure your team wins as much as possible. Build new cars and parts to ensure you succeed. Grand Prix Stories is a one-time purchase without ads or micro-transactions. It's a whole sound, quirky and fun experience that will put you in the manager's chair. Another racing sim, Grand Prix Story, take a more capricious and less realistic approach. Enjoy a cute art style while managing your team to the ultimate victory! Data Wing is a racing adventure through pure neon style. The visual styling is certainly impressive and I love every minute I spent in the Data Wing. The touch controls are absolutely point and incredibly sharp and the level looks great and it has a good skill ceiling. Behind the Data Wing is a fun story like the original Tron in several ways. You'll probably finish it pretty fast, but it's really fun to go back and start over again. There is a high replay value here. Its soundtrack is pretty awesome too. I love everything about the data wing and it lacks the drawbacks and caveats I usually have to be aware of. It's free and doesn't have ads or IAP. An excellent giveaway, The Data Wing is a luxury racing adventure that takes obvious cues from Tron's neon scape. It's a great little game and worth playing. Beach Buggy Racing 2 is a classic Mario Kart or Diddy Kong Racing (who remembers?). It's a kart racer with power-ups and fierce competition through wacky environments as you race to the top. But there's a little more content here to enjoy and work towards than the classic style of the game. Not only can you collect cars and drivers, there are certainly plenty there, but you can level up the power-ups. There are many game modes including online competitive multiplayer, so you'll have more than enough. Beach Buggy Racing 2 is a fun racing experience and very inspiring of the classics I mentioned above. I don't feel bad about supporting developers because it's free to play but not super invasive to its monetization and the game is so much fun. You're really just paying to speed up progress in the game. Beach Buggy Racing 2 brings you back to a good ol' day of console kart racing games. It's cute, it's fun, and it's a great time all around. It's obviously so popular that it's hard to believe that I've never heard of Nitro Nation Drag & Shift before, especially given that it's a ridiculous name. So I decided to give it a try and knew almost immediately that it needed to be here on this list, and this usually comes from people who don't like racing games. Because despite some in-app purchases, Nitro Nation, as it will be called in the future, is away from the usual freemium pitfalls found in these types of games (some of which are included in this list). It's an IAP for featured cars and in-game currency, honest to a goodness racing game full of drag racing goodness. There are absolute tons to do in Nitro Nation, lots of cars to aspire to, tuning, unlocking cosmetics, and just a bunch. It's almost overwhelming. And without the usual nonsense of the energy system, the wait for upgrades or anything like that, you can focus on enjoying the experience the game has to offer. I think you'll really like this. Despite its nasty long name, Nitro Nation Drag & Shift is just the right drag racing game with tons to do, lots of cars and cosmetics to unlock, and some great gameplay to enjoy. Dirt Track in 2 is a sequel to the excellent Dirt Track Inn (of course). It may not look like any other game on this list, but it has a solid gameplay base, some variety, and a race against AI and other players. What's more, it has simple and tight controls that are all you can ask for in any racing game. There are a lot of customizations, 5 car models to choose from, career mode, and PvP. There are also several other modes to time trial and play. This is a fun game to play to kill some time. Dirt Track in 2 is a lot of fun racing games to customize and do. it may not be visible but it has a solid foundation. Here we present free play, freemium games and hill climb racing 2 races like others nevertheless a fun time. There are many vehicles to unlock, upgrades to buy, customization of both vehicles and characters, and several different game modes (such as offline adventure and arcade). As you guessed by name, the game is all about you climbing others as a race and down the hill. It's an easy game, but a lot of fun. Since you can't find much realism here, I suggest you check it out if you like more whimsical racing games. Hill Climb Racing 2 challenges to beat everyone on and down the hill. There are a number of vehicles to unlock, purchase upgrades and customizations. Update December 2020: We have added Dirt Track Inn 2 and Hill Climb Racing 2 to our list! More information. More.
